

**Lletra de la cançó "Shut 'em down"**  
**Gil Scott-Heron (1948-2011)**

“Did you feel that rumble? Did you hear that sound,  
Well It wasn't no earthquake but it shook the ground,  
Made me think about power like it or not,  
Got to work for Earth for what it's worth,  
'Cause it's the only Earth we've got,

Shut 'em down  
if that's the only way to keep them from melting down,  
Shut 'em down  
if that's the only way to keep them from melting down,

I heard a lot about safety and human error,  
A few dials and gauges is just a wing and a prayer,  
If you need perfection and that's what it takes,  
Then you don't need people, can't use people,  
You know people make mistakes,

Shut 'em down  
if that's the only way to keep them from melting down,  
Shut 'em down  
if that's the only way to keep them from melting down

Did you feel that rumble? Did you hear that sound,  
Well it wasn't no earthquake but it shook the ground,  
Made me think about power like it or not,  
Got to work for Earth for what it's worth,  
'Cause it's the only Earth we've got,

Shut 'em down  
if that's the only way to keep them from melting down,  
Shut 'em down  
if that's the only way to keep them from melting down...”  
if that's the only way to keep them from melting down,  
Shut 'em down  
if that's the only way to keep them from melting down...”
